PULMONARY PHARMACOLOGY

Subject and Author Index

Subject Index to Volume One

A

Adenosine, effects on cholinergic neurotransmission in tracheal smooth muscle, 193
Adrenaline, circulating levels in elderly asthmatics, 3
Adrenergic agonists, effects on cholinergic neurotransmission in tracheal smooth muscle, 193
α-adrenergic bronchoconstriction, airway distribution, 63
β-adrenoceptor
  classification, in tracheal smooth muscle, 173
  reactivity, active sensitisation modifying, in trachea, 161
  stimulation
    alveolar macrophage activation and, 101
    ganglionic transmission inhibited by, in trachea, 167
Airway mechanics, tracheal instillation of elastase and its effects on, 139
Airway responses/reactivity, *see also* Bronchial responsiveness
  in allergic asthma, inhaled budesonide and its effects on, 179
  regional differences, 125
  to substance P/substance P fragments, 113, *see also types of responses*
Airway smooth muscle, *see* Smooth muscle
Allergic asthma, effects of inhaled budesonide in, 179
Alveolar macrophage activation, inhibition, 93
Anaphylatoxin $C3_a$ peptide effects on pulmonary vasculature, 133
Anaritide, bronchoprotective and bronchodilator activity of, 119
Asthma
  acute severe, elderly with, Neuropeptide Y and adrenaline levels in, 3
  allergic, effects of inhaled budesonide in, 179
  nocturnal, theophylline pharmacokinetics and effects in, 77
  steroid-dependent, hydroxychloroquine in, 59
Asthmatic(s)
  bronchial responsiveness to methacholine and histamine in, relationship between, 53
  elderly
    circulating adrenaline levels, in, 3
    Neuropeptide Y and adrenaline levels in, 3
  neurokinin A-induced bronchoconstriction in, oxitropium effects on, 41
  smooth muscle from, responsiveness to relaxant and contractile agonists, 25
Asthmatic reactions, late, inhaled beclomethasone effects on, 15
Atrial natriuretic factor [102–126], human, bronchoprotective and bronchodilator activity of, 119

B

Beclomethasone, inhaled, effects, 15
Bronchial responsiveness to methacholine and histamine in asthmatics, 53
Bronchial smooth muscle in asthmatics, responsiveness to relaxant and contractile agonists, 25
Bronchoconstriction
  adenosine-induced, theophylline and enprofylline interactions with, 85
  α-adrenergic, airway distribution, 63
  capsaicin-sensitive sensory neuron-mediated, 33
  neurokinin A-induced, 41
  oxitropium bromide effects on, in asthmatics, 41
  ultrasonically nebulised water-, prevented by inhaled frusemide, 187
Bronchodilator activity of anaritide, 119
Bronchoprotective activity of anaritide, 119
Bronchus
  contractile effects of neuropeptides in, potentiated by enkephalinase inhibitor, 21
  smooth muscle, from asthmatics, responsiveness to relaxant and contractile agonists, 25
Budesonide, inhaled, effects in allergic asthma, 179

C

Calcium concentration-tension curves in tracheal muscle, dissociation constant of verapamil estimated from effects on, 7
Capsaicin-sensitive sensory neurons, cough and bronchoconstriction mediated by, 33
Cholinergic neurotransmission in tracheal smooth muscle, effects of adrenergic agonists and adenosine on, 193
Cholinomimetic contractile responses, airway distribution, 107
Constriction, *see* Bronchoconstriction; Smooth muscle; Vascular constriction
Contractile agonists, responsiveness of bronchial smooth muscle to, 25
Contractile responses, cholinomimetic and parasympathetic, airway distribution, 107
Corticosteroid effects on airway smooth muscle cells, 69
Cough mediated by capsaicin-sensitive sensory neurons, 33

D

Dilator activity of anaritide, 119

E

Elastase, tracheal instillation, effects on airway mechanics, 139
Enkephalinase inhibitor, contractile effects of neuropeptides potentiated by, 21
Enprofylline, adenosine-induced bronchoconstriction and, interactions, 85

F

Forskolin, alveolar macrophage activation inhibited by, 101
Frusemide, inhaled, ultrasonically nebulised water bronchoconstriction prevented by, 187

G

Ganglionic transmission inhibited by β-adrenoceptor stimulation in trachea, 167

H

Histamine responsiveness and methacholine responsiveness, relationship between, 53
Hydroxychloroquine in steroid-dependent asthma, 59
5-Hydroxytryptamine (serotonin)-induced pulmonary responses, 93
5-Hydroxytryptamine$_2$ receptor-mediated pulmonary vascular constriction, 93
Hyperresponsiveness, airway, in allergic asthma, inhaled budesonide and its effects on, 179

L

Lung function indices in allergic asthma, inhaled budesonide and its effects on, 179

M

Macrophage activation, alveolar, inhibition, 93
Methacholine, responsiveness to
  histamine responsiveness and, relationship between, 53
  increased, toluene diisocyanate-induced, beclomethasone effects on, 15
Muscle, *see* Smooth muscle

N

Neurokinin A
  bronchoconstriction induced by, in asthmatics, oxitropium bromide effects on, 41
  NK1 receptor binding by, 201
Neuropeptide(s), contractile effects, potentiation, by enkephalinase inhibitor, 21
Neuropeptide Y plasma concentrations in elderly asthmatics, 3
NK1 receptor binding by neurokinin A and substance P, 201

O

Oxitropium bromide, effects on bronchoconstriction in asthmatics, 41

P

Parasympathetic contractile responses, airway distribution, 107
Phosphodiesterase inhibition, alveolar macrophage activation and, 101
Pulmonary vein contraction, thromboxane-induced, elicited by substance P, 153, *see also* Vasculature

R

Relaxant agonists, responsiveness of bronchial smooth muscle to, 25

S

Serotinin, *see* 5-Hydroxytryptamine
Smooth muscle
  airway, 5-hydroxytryptamine$_2$ receptor mediated constriction, 93
  bronchial, in asthmatics, responsiveness to relaxant and contractile agonists, 25
  tracheal
    β-adrenoceptor classification in, 173
Ca concentration-tension curves in, dissociation constant of verapamil estimated from its effects on, 7
  cholinergic neurotransmission in, effects of adrenergic agonists and adenosine on, 193
Smooth muscle cells, airway, membrane properties of, 47
  corticosteroid effects on, 69
Steroid-dependent asthma, hydroxychloroquine in, 59, *see also* Corticosteroids
Substance P
  airway responses to, 113
  NK1 receptor binding by, 201
  thromboxane-induced pulmonary vein contraction elicited by, 153
Substance P fragments, airway responses to, 113

T

Theophylline
  adenosine-induced bronchoconstriction and, interactions, 85
  slow-release formulations, in nocturnal asthma, pharmacokinetics and effects of, 77
Thromboxane-induced pulmonary vein contraction elicited by substance P, 153
Toluene diisocyanate-induced increased responsiveness to methacholine, beclomethasone effects on, 15
Trachea,
  active sensitisation modifying β-adrenoceptor reactivity in, 161
  β-adrenoceptor stimulation inhibiting ganglionic transmission in, 167
Tracheal instillation of elastase, effects on airway mechanics, 139
Tracheal (smooth) muscle, *see* Smooth muscle

U

Ultrasonically nebulised water bronchoconstriction prevented by inhaled frusemide, 187

V

Vasculature, pulmonary, constriction/contraction
  anaphylatoxin $C3_a$ peptide-induced, 133
  5-hydroxytryptamine$_2$ receptor-mediated, 93
Verapamil dissociation constant, estimations of, from its effects in tracheal muscle, 7

W

Water-induced bronchoconstriction, ultrasonically nebulised, prevented by inhaled frusemide, 187
